

Accessibility Statement

POLENGHI – FOOD S.r.l. is committed to making its website accessible, in accordance with Italian Law No. 4 of 9 January 2004.

This accessibility statement applies to the website: <https://actilemon.it/>

Compliance Status

Non-compliant

This website is not compliant with the requirements set out in Annex A of the UNI CEI EN 301549 standard, due to the non-compliance issues listed below.

Non-accessible content

The contents listed below are not accessible due to non-compliance with Italian Law No. 4 of 9 January 2004.

The website may present accessibility difficulties for some users, particularly for those who use assistive technologies such as screen readers or alternative input devices, or for users with visual, auditory, motor, or cognitive impairments.

- **Missing or insufficient alternative text for images**

Images should always include a textual description that allows users who cannot see them to understand what they represent. When this text is missing or unclear, users relying on screen readers lose important information.

- **Information and relationships**

Relationships between content elements (labels, headings, sections, forms) should not rely solely on visual layout but should be properly coded so that the hierarchy and meaning of the content can be understood programmatically.

- **Identifying the purpose of input fields**

The purpose of each input field used for data collection should be clearly identified to facilitate autofill functionality and improve accessibility and usability.

- **Use of color**

Some visual elements on the website that convey meaning are not accompanied by textual alternatives, icons, or other visual indicators, making it difficult for users with color perception deficiencies to understand the content.

- **Insufficient contrast between text and background**

When the colors of text and background and/or interface components and meaningful graphics (e.g. buttons, icons) are too similar, users with visual impairments or color blindness may have difficulty reading the content.

- **Reflow**

Content should be usable without loss of information or functionality, without requiring horizontal scrolling, including when viewed on mobile devices.

- **Link purpose**

Each link should have a clear and understandable purpose, even when taken out of its visual context. Users should be able to understand where a link leads by listening to the link text alone.

- **Visible focus**

When a user navigates the page using a keyboard, the active element must always be clearly visible through a visual indicator, helping users who do not use a mouse to identify which element is currently selected.

- **Parsing (syntax analysis)**

The HTML, XHTML, or XML code of the page should be well-formed and valid so that assistive technologies and browsers can correctly interpret the page.

- **Name, Role, Value**

User interface (UI) elements must have: a Name (programmatically determinable), a Role (e.g. button, checkbox, combobox, etc.), a Value, where applicable (e.g. the value of an input field).

Preparation of the accessibility statement

This statement was prepared on 13 January 2026.

The information contained in this statement is based on a self-assessment carried out directly by the service provider.

The statement was last reviewed on 13 January 2026.

Feedback and contact information

If you wish to contact the website owner to report accessibility issues or request non-accessible content, you may use the following email address: info@polenghigroup.it

Person responsible for handling accessibility reports: Polenghi Food S.r.l.

Reporting to AgID

In the event of an unsatisfactory response or no response within thirty days of the notification or request, the user may submit a report using the procedure indicated on the official AgID website.
